Please call **01342 302250** for a RAL or Special Finish chart

Delivery

3-5 working days for white RAL 9010
15 working days for colours & special finishes, please allow up to 25 working days
for orders of more than 10 radiators in colours or special finishes

The Sectional Aluminium range offers 5 designs to accommodate any choice of interior scheme and is incredibly versatile with hundreds of possible size options across the range all available from stock.

You can select your radiator in 3 ways

- Using the Quick Selection tables (our most popular sizes) on pages 149-154
- Use our online radiator builder to help select the best configuration for your room, www.theradiatorcompany.co.uk
- Build a radiator by section to meet your needs using the section tables on pages 151-154, you can alter the height and number of sections to achieve required BTU output within a fixed space.

Ordering your sectional Aluminium Radiator can be completed in a few simple steps

- All prices and outputs are given by section.
- Price per section includes plugs, bushes, air vent and wall brackets

First work out the required heat output for your room; to find your outputs consult your installer or you can use the heat output calculator on our website www.theradiatorcompany.co.uk, then choose one of the three methods above to specify your radiator; Quick Pick, Online or select using the following process;

- 1. Consider the rough dimensions of the radiator(s) you need for your room(s);** vertical or horizontal, length, height & depth
- 2. Choose a suitable height per section allowing at least 100mm for pipework coming from the floor**
- 3. Calculate the number of Sections you need by dividing the required BTU (Watt) output with the BTU (Watt) output per section;**
e.g 4811 BTUs divided by 420 = 11.45, (we always suggest rounding up, as it is better to have too much output, than too little) therefore 12 sections based on Vip 590
- 4. Choose your colour;** our Aluminium Radiators are now available in a selection of the top 25 most popular colours from the RAL range. Please specify your RAL colour at time of order. White RAL 9010 is our standard.

4 exclusive special finishes (Colour Group A), with optional end panels, these radiators are available from stock in up to 15 working days.

Please note, due to the printing process, these colours may not be representative of the true finished colour.

To order RAL Colour Charts or for help choosing sizes, please call our Customer Services team on 01342 302250

- 5. Work out the price of your radiator by multiplying the section price by the total number of sections** e.g Vip 590 high, 12 sections in white = £32.34 x 12 = £388.08 (inc VAT)

- 6. Place your order by using the Sectional Model Code x No. of Sections needed and noting the colour number and name selected;**
e.g VIP59 X 12 in White RAL 9010
